Overview

This is a written **endresult** which is communicated with client OlaFresco BVB. After communicating start points and ideas presented in Canva presentation on meeting dated 15.08.2021. OlaFresco was provided with a wireframe of the website, mind map and mockup version of the mobile app.

Achieved Goals

1. Client and provider agreed on ideas and proposals in the forms of mind map, wireframe and mockup app.

2. Provider will respect and deliver the project in concluded deadlines.

3. Client will make payments in concluded steps and respect deadlines.

Specifications

- Ready to cook meal in the box website/app
- Website is in the form of a single page but we are more focused on responsive mobile first delivery. After a successful testing period and positive results we are going to proceed with Android and IOS app development.
- Designing details like colors, images and text are also provided. We agreed on earthy, eco colors like green, dirty white, deep purple and white. Images of meals are provided by the client, also the textual description of the meal.

- Client as a user has limited access to the admin panel button from which can access functionalities like adding new meals, recipes and boxes, change prices and text.
- Website has a landing page which is also a homepage and call to action button on focus to order a meal.
- Header has three different pages: about us, how it works? and recipes
- Users can click on each page and scroll till the footer
- Users have access to private account on login button where they can manage their subscription and change personal data and payment methods
- Online payment is available through credit cards, debit cards or bancontact. It is secured with Stripe secure online payments.
- Deliveries are possible by courier companies which will be agreed with the client, by drone on contract with DRONES.be company and by pickup. Also during COVID-19 safety measures no-contact delivery is enabled.

Milestones

I. OlaFresco Mind Map

In discussion and few meetings, a mind map is made and agreed on by both sides, client and provider. Information is visually organized and hierarchical shows relationships among pieces of the whole website. It is provided in digital form.

II. OlaFresco Wireframe

Visual guide that represents the skeletal framework of a website is provided. Created for the purpose of arranging elements to best accomplish a particular purpose of the website. It is provided in digital form.

III. OlaFresco Mockup App

Provider delivered a mockup which is a static design of a web page or application that features many of its final design elements but is not functional yet. A mockup is not the first stage of website development, so it's on its way to being a finished product, but it still has a ways to go.Both sides agreed on the first version but it is still open for discussion and editing.

IV. OlaFresco Prototype

Next stage.

V. OlaFresco Deployment Time

Next stage.

VI. OlaFresco Production and Testing

Next stage.

VII. OlaFresco End of a Project and Delivery

Final stage.
